Notes

* In general, AspenTech aspenONE® software license agreements with customers permit use of the licensed software on Supported Computers at customer Sites. "Supported Computers" include computers with a manufacture, model and operating system for which AspenTech offers a supported version of the software, and that are controlled by the customer. "Sites" are customer facilities or locations specified in the license agreement. AspenTech permits customer use of licensed aspenONE software in the cloud where: (i) the Platform Support specifications published by AspenTech for the relevant version of the software product include cloud support; (ii) only the customer has access to the licensed software hosted by the cloud service provider; and (iii) the user is accessing the software only from a Site specified in the applicable license agreement. Cloud deployment does not change any license restrictions, including the restrictions on which regions can access the software.	Manufacturing Execution Systems (MES) suite consists of the following products: Aspen InfoPlus.21 (IP21), Aspen Production Record Manager (APRM), Aspen Unified Reconciliation and Accounting (AURA), Plant Operations 32-bit (ATOMS Server), Plant Operations 32-bit (ATOMS Client), Plant Operations 32-bit (AORA Server), Plant Operations 32-bit (AORA Client), Aspen Production Execution Manager (APEM) Server, APEM Mobile, Weigh & Dispense Client, Aspen Reporting Framework
When running software on a virtual machine, the machine should meet the same requirements.	
AspenTech does not support the in-place upgrade of the Operating System (for example: upgrade Windows 7 to Windows 10) with AspenTech software already installed. Our recommendation is to uninstall Aspen Software before upgrading the OS and reinstall it after the upgrade.	
Your Aspen SLM Server must be installed and running prior to installing any V14 product.

V14.5 Platform Specifications that are supported	Aspen Cloud Connect	Manufacturing Execution Systems (MES) Desktop Apps	Manufacturing Execution Systems (MES) Admin Tools	aspenONE Web Server	aspenONE Process Explorer Client (A1PE)	InfoPlus.21 (IP.21) Server	Cim-IO Interfaces [11]	Aspen Infrastructure(ADSA)	Aspen Production Record Manager (APRM) Server	

If running standalone, 1280 x 800 is the minimum recommended resolution monitor for servers.
For SLM server using Type 1 Desktop configuration, the minimum memory is 4GB with 20GB hard drive.
Microsoft Active Directory/Domain Services (Required for aspenONE Web Server)
A minimum of 10GB of free space is needed to install/upgrade products on the C drive.
[1] This configuration is only practical for small scale models and deployments. For most applications, best deployment practice dictates the use of a separate and dedicated database server for acceptable performance
[2] EDR does not use any database servers. Deploys its own LocalDB database files.
[3] Aspen Batch Process Developer does not support the 64-bit version of Visio. Visio is used in ABPD to generate the block diagram and process flow diagram reports; it is an optional feature. The 64-bit versions of Word and Excel are fully supported by ABPD.
[4] When Aspen Utility model is driven by Aspen Online using Local System Account, then SQL Express 2014 is required.
[5] When Exchanger Design and Rating is driven by Aspen Online using Local System Account, then SQL Express 2014 is required
[6] Aspen Modeler family supports FORTRAN compiler version 2020
[7] Oracle or AdoptOpenJDK Java is needed if the 3rd party scheduling application Primavera is used with Economic Evaluation (EE). Primavera is owned by Oracle and its API uses Java.
[8] Must be in compatibility mode for Aspen Process Sequencer
[9] See "Basic Deployment Recommendations" in Appendix C of the Aspen Manufacturing Suite Advanced Process Control Installation Guide.
[10] For new installations of APC Web Server, install IIS and JRE before installing APC Web Server
[11] CIM-IO Interfaces can be installed on 32-bit desktops
[12] This configuration is only practical for small scale models and deployments. For most applications, best deployment practice dictates the use of a separate and dedicated database server for acceptable performance.
[13] Refer to KB 50134 For more information on configuring SCM products using Azure and AWS: https://esupport.aspentech.com/S_Article?id=000050134
[14] Only Web Download Excel Add-in requires Excel.
[15] Users need to install both the 32-bit and 64-bit Oracle Clients 19.x for building and running reports
[16] Non-English OS's are not supported

28 APEM does not support CDB-PDB database in Oracle 19.
Weigh & Dispense Client 32-bit does not support Oracle

29 SCCM support for APEx only

30 APM Insights must be installed on the same server as AEI.

31 When you have more than 8 simultaneous users, the recommendation is 2CPU's and 4GB RAM per user. Performance will vary based on product and usage profiles. This can be considered a starting point for large multi-user machines.

32 OptiPlant requires a graphic card which supports OpenGL 4.1

33 Includes support for Windows Server Datacenter

34 Browser support for AFO Connect

35 Type II is the minimum recommended when IP.21 is used with Aspen Enterprise IP.21 Historian

36 Small SLM Server

37 Medium SLM Server

38 Large SLM Server

39 These applications can run on a desktop, but it is recommended to run models on a server and have users connect via Citrix or Terminal Services.

40 This Application Should be installed on a dedicated Web Server.

41 Azure Managed Instance is the recommended option for Azure SQL infrastructure. For assistance with database creation scripts, please contact the AspenTech Support team.

42 "Desktop Experience" installation of Windows Server. Windows Server installers present the option to install with or without "Desktop Experience". For GDOT, "Desktop Experience" is required.

43 SQL is needed for S3D Layout, SQL versions 2014 and 2016 are supported by Hexagon

44 Resolution no higher than 1920x1080

45 Refer to the AspenTech Lifecycle Knowledge Base article to see a reference to the supported Windows Server upgrade path: https://esupport.aspentech.com/S_ProductLifecyclePolicy

46 The selected product uses Java 11 JRE as Oracle do not have an option to download JRE, please use Oracle JDK download

47 SQL Server 2014 does not support AT TIME ZONE functionality.. Due to this, Daylight Saving time will not be accounted for in the database views defined in Unified Scheduling Results database.

48 Only Excel Document template does require Excel

49 Only Core service requires MongoDB

50 Applicable only for OpenviewNET client applications that connect to the Operational Insights server.

51 Applicable only for Aspen Mtell Client applications like Aspen Mtell Agent Builder and Aspen Mtell System Manager. Aspen Mtell Server is recommended to be hosted on a Server class operating system.

52 Applicable only for users who write custom Loglan code when using V14.5 and above versions.
